

Coding Question – Tab Gallery:

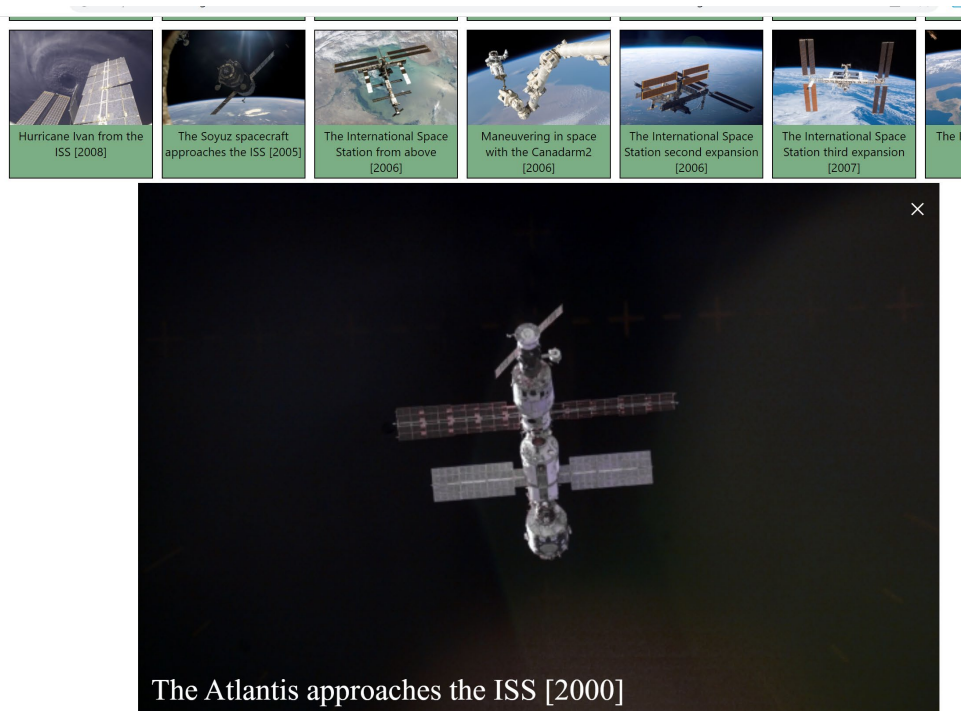

A video has been created to show the changes you need to make to the start files for this exercise. Instructions are also described below:

You are provided with a webpage codes that is illustrated as:

Your task is to make changes to HTML, CSS, and add JS file so you create a Tab Gallery, with one larger image below the thumbnails as you click on each image the corresponding image shows larger below the thumbnails, with a closing “X” on the top right corner, and the caption below the image.

A sample completed snapshot is shown below:

Each click should open each image, and click on “X” should close it.

- Hint: You can refer to W3school for reference:
https://www.w3schools.com/howto/howto_js_tab_img_gallery.asp
- All images open and close with a click (**8 marks**)
- Adding Opaq effect to thumbnails (**4 mark**)
- All images get the caption and show it below the large image (**3 marks**)
- Partial coding (with some useful code for the challenge) may get maximum up to **2 marks**.

Please put all your JavaScript, CSS, and HTML files in one folder, then zip it and submit.
